

Morad and Sofia are originally from Morocco. They have lived in Hampton Roads for 10 years now. Morad is currently an HVAC Technician at the shipyard. Sofia is a Cybersecurity student at TCC. They love to fish, read, cook, and play together as a family.

They have three beautiful children. Their son, Yasser, is 8 years old and a delightful, bright boy! He loves computers and is a master at coding in the 3rd grade. Their daughter, Ikram, is 6 years old, in the 1st grade. She is very smart, sweet, and the light of the house! They also welcomed their newest daughter, Sara, in June, making her 2 months old now!

They are currently living in an unhealthy, cramped 2-bedroom apartment. Their monthly rent just went over \$1,200.00. The bathroom is riddled with mold and the ceiling is constantly wet and cracking with peeling paint. The neighbor smokes heavily and it carries over to their apartment through the vents and is extremely bothersome to their son, who has asthma. There is no space for the children to play and the son and daughter are sharing a bedroom. There is no laundry facilities at the complex so a lot of time and money is spend at the laundry mat.

They are so excited and feel blessed to be matched to a home. They are looking forward to having an affordable, safe home with their own space and provide their children with a healthier environment, as well as a yard to play iin. They feel incredibly blessed to be a Habitat Partner Family!
